Liquid air freshener and water treatment for use with humidifiers

CROSS-REFERENCE TO RELATED APPLICATIONS / Not Applicable

STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR  
DEVELOPMENT / Not Applicable

REFERENCE TO SEQUENCE LISTING / Not Applicable

### BACKGROUND

The present invention is a liquid air freshener for use with various types of humidifiers. Specifically, this invention is an all-in-one liquid solution consisting of the following elements: a fragrance concentrate, water, color dye, anti-bacterial concentrate, and lime and calcium cleaning agent. The liquid solution benefits the user by providing a certain desirable scent to the immediate surrounding air, while at the same time providing a water treatment aiding in the cleaning of the humidifier.

### BRIEF SUMMARY OF THE INVENTION

This invention provides a desired fragrance through the use of humidification to the immediate surrounding environment while also providing a water treatment to aid in the cleaning of the user's humidifier. While water treatment products exist for the cleaning of humidifiers, none release fragrance, which gives a freshening effect to the immediate surrounding environment. In addition to the freshening of the immediate environment, certain fragrances are well known to provide aroma therapy, which may benefit the user with emotional, physical, and spiritual well being.
